The MAILING DATE of this communication appe	ars on the cover sheet with the c	orrespondence add	ress				
THE REPLY FILED 08 December 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:							
a) The period for reply expires <u>03</u> months from the mailing date of the final rejection.							
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).							
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL							
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). AMENDMENTS							
3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because							
(a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);							
(b) They raise the issue of new matter (see NOTE below);							
(c) They are not deemed to place the application in bel	tter form for appeal by materially re	ducing or simplifying	the issues for				
appeal; and/or	agreementing number of finally rei	acted alaima					
(d) They present additional claims without canceling a	· -	ected claims.					
NOTE: See Continuation Sheet. (See 37 CFR 1.1		maliant Amandment	DTOL 224)				
4. The amendments are not in compliance with 37 CFR 1.1		mphant Amendment	PTOL-324).				
5. Applicant's reply has overcome the following rejection(s)		timaly filed amondana	nt concoling the				
 Newly proposed or amended claim(s) would be all non-allowable claim(s). 	llowable if submitted in a separate,	timely filed amendme	nt canceling the				
7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is pro The status of the claim(s) is (or will be) as follows:		ll be entered and an e	explanation of				
Claim(s) allowed:							
Claim(s) objected to: Claim(s) rejected: 1-15.							
Claim(s) withdrawn from consideration:							
AFFIDAVIT OR OTHER EVIDENCE			•				
 The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good an was not earlier presented. See 37 CFR 1.116(e). 							
9. The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to of showing a good and sufficient reasons why it is necessar	overcome <u>all</u> rejections under appea y and was not earlier presented. S	al and/or appellant fai ee 37 CFR 41.33(d)(1	ls to provide a).				
10. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. REQUEST FOR RECONSIDERATION/OTHER							
 The request for reconsideration has been considered bu See Continuation Sheet. 			nce because:				
12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s).							
13. Other:							

Continuation of 3. NOTE: The limitations "the first set of cutting lines spanning the entire width of the first and second substrates" and "the second set of cutting lines spanning only a portion of the first and second substrates" in new claim 16 raise new issues that would require further consideration and/or search.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments are not persuasive. At first, Applicant argued that Kodera does not disclose that the first cutting lines extend over at least one sealant pattern, instead, cutting across the seal. The Examiner disagrees since Fig. 28 of Kodera shows that the cutting lines 108 not only cut across the seal 106 but also extend over the seal 106. Applicant also argued that , in Fig. 8A of Shiraishi, the seal under the cutting line F (which is horizontal) cannot bind the vertical portion (between lines A and G) to the horizontal portion during the separating process. The Examiner disagrees. Since the seal layer is formed on the scribe cracks A, F, L, the horizontal portion, which is construed as the main dummy glass substrate, is obviously binded by the seal 2 during the separating process as shown in Fig. 9B and the vertical portion, which is construed as the secondary dummy glass substrate, is also obviously binded by the seal 2 during the separating process as shown in Fig. 8B. Thus, the applied reference discloses a sealant pattern located right underneath the cutting lines for binding the horizontal and vertical pieces together during the separating step.
